

Environmental Scientist / Biologist

This position involves a background in Environmental Science or Biology with experience in GIS. This position will focus on projects involving wetlands delineation, permitting and mitigation, and threatened/endangered species assessment as well as supporting a wide variety of projects including NEPA reviews, inspections, sampling, environmental compliance, and GIS mapping.

Principal Responsibilities:

- Conduct wetland delineations in accordance with regulatory standards.
- Responsible for preparing technical reports.
- Organize field data, photographs, and datasheets.
- GIS mapping and report compilation.
- Conduct threatened and endangered species assessments.
- NEPA compliance reports.
- Flexibility to do fieldwork (including overnight stays).
- Maintain strong communication with managers and team members.
- Perform other job-related duties as assigned.

Other Duties:

- Potential to obtain drone pilot license and conduct drone surveys.
- Processing of drone data.
- Conduct groundwater, methane, and storm water compliance inspections, sampling, and reporting as needed.
- Other duties as assigned.

Skills/Qualifications:

- Bachelor's degree in related field required
- Experience in GIS, and ArcPro required.
- Knowledge of environmental regulations relating to air, water, solid waste, soil, and other material samples.
- Knowledge of environmental permitting and wetland delineation reporting.
- Knowledge of NEPA.
- Strong time management and organization skills.
- Strong technical writing and oral communication skills required.
- Strong analytical and problem-solving skills.
- Attention to detail & ability to work independently (once trained) as well as desire to learn and follow procedures.
- Ability to think critically.
- Ability to effectively manage multiple tasks and meet deadlines in a fast-paced environment.
- Ability to read, analyze, and interpret business documents, professional journals, technical procedures, and governmental regulations.
- Ability to adhere to company policies and rules set forth; promotes company's safety standards; works with a sense of honesty and trustworthiness.
- Must possess strong computer skills.
- Must pass drug test, physical and background check.
